on your energy bills with
our sustainable upgrades*

“Burbank is committed to sustainability and building a better future.

As a business we are dedicated to minimising the impact that our industry and our business has on the environment.

We are proud to support local Australian carbon offset programs.

All projects affiliated to our Sustainable Program are ‘Verified Carbon Verra Standard’ and are 100% sustainable and ethical, meaning they are not only beneficial to the environment, but also have cultural, economic and social benefits.

Burbank Managing Director
Jarrod Sanfilippo

We will plant 5,000 native trees by 2027.

\$3,499

Carbon Footprint

See next page for more details.

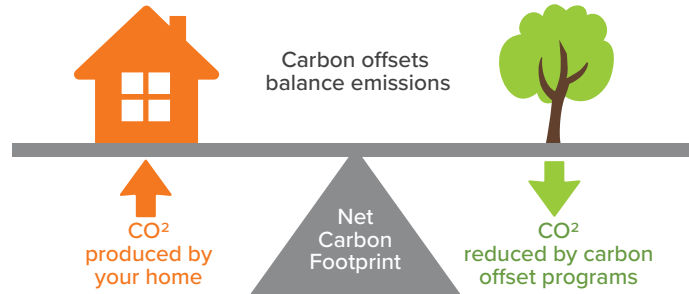

From \$500

*Head to www.burbank.com.au/sustainability to see further details and associated terms and conditions.

CARBON OFFSET YOUR BUILD

Carbon offset your build to support sustainable projects for a better future.

100% of proceeds go direct to Carbon Offset Programs.

Support our not-for-profit Carbon Offset Program that removes, reduces and prevents harmful carbon emissions through a range of projects.

How it works

We have joined forces with a leading life-cycle carbon assessor (Rapid LCA) to calculate the carbon offset of each of our home builds. We then offer the opportunity to carbon offset the build when finalising your new home details. All funds then go directly into supporting our chosen Carbon Offsets Programs.

Offsetting Options

Burbank can provide options to offset the full amount of your specific house design or a portion of it.
